

## About CAMEO Chemicals

CAMEO Chemicals is a tool designed for people who are involved in *hazardous material* incident response and planning. This tool is part of the [CAMEO software suite](#), and it is available as a [website](#) and as a [downloadable version](#) that you can run on your own computer.

CAMEO Chemicals contains:

- A library with thousands of datasheets containing response-related information and recommendations for hazardous materials that are commonly transported, used, or stored in the United States.
- A *reactivity* prediction tool, which you can use to predict potential *reactive* hazards between chemicals.

CAMEO Chemicals was developed by the National Oceanic and Atmospheric Administration's [Office of Response and Restoration](#) in partnership with the Environmental Protection Agency's [Office of Emergency Management](#) and the U.S. Coast Guard's Research and Development Center.
