"SPILL DRILL" and "WORKING HAND IN GLOVE" VIDEOS

"Spill Drill" (Consists of 3 segments: "Spill Drill", "Dressed for Success" and "It's Everybody's Business")

This three part video program is designed to help spark discussion around hazardous waste and chemical emergency response issues. The aim of the program is to involve union members, family, friends, and other community members in a discussion that allows everyone to express their views and have those views respected. The video is designed so that after each segment, the video is stopped and a short discussion about that segment takes place using questions such as those provided in the discussion leader's manual.

"Working Hand in Glove"

This video is designed to trigger discussion on choosing the correct type of gloves for a particular chemical, routes of entry of chemicals into the body, limitations on use of company doctors to detect problems caused by workplace chemicals, and the importance of union involvement to improve workplace health and safety.

To order, complete the form below and send a check for $10 per video payable to the International Chemical Workers Union Council to:
